

WODWOL

MODMOT

A misty forest scene with tall, slender trees. Sunlight filters through the dense canopy, creating a soft, ethereal glow. The ground is covered in fallen leaves and forest floor debris.

About WodWol

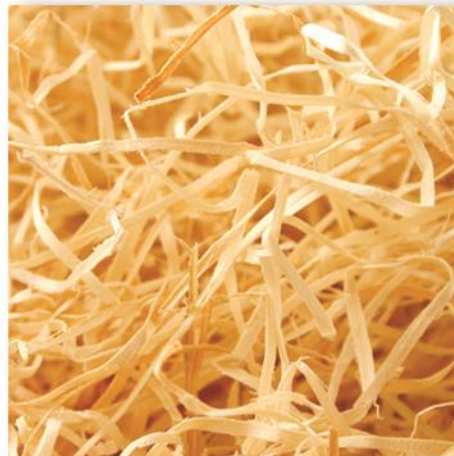

WodWol is now a leader in the eco-friendly, high-performance coustical-panel products category. WodWol performs well by absorbing sound; ecologically, it is simple to produce; and panels are available in many size and color variations that can be designed to fit nearly any decor. It can be widely used in the stadium, theatre, meeting room, church, factory, schools, library, etc.

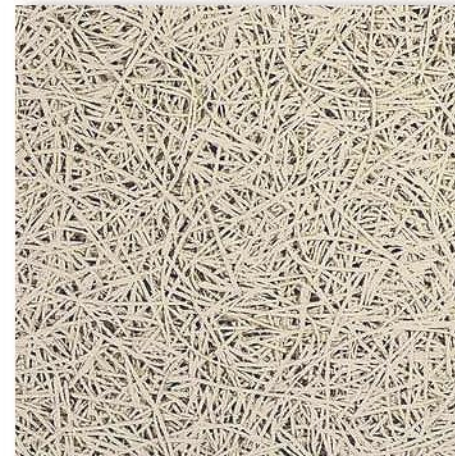

Wood Logs

Wood logs are harvested from plantations which aid in forest sustainability.

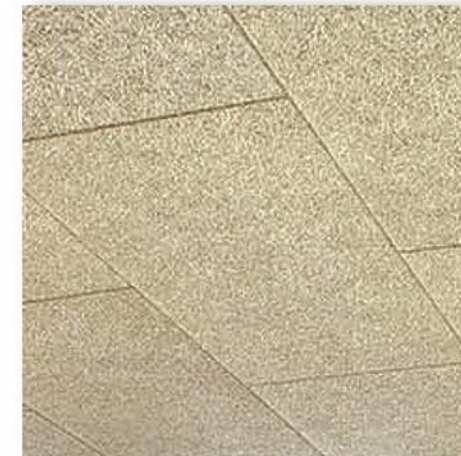

Shredded Wood Fibers

Wood Logs are then shredded into fine fibre strands.

Bonded With Cement

Wood fiber is mixed with portland cement followed by being cured in a hot pressed oven.

End Product

Firm and steady panel with a unique porous surface ready to use.
